Summary

Final year Information Technology student with hands-on experience in full stack development and AI/ML projects. Skilled in building responsive applications, deploying intelligent systems, and delivering measurable impact through internships and real-world solutions.

EDUCATION

Pillai College of Engineering — **Panvel, Navi Mumbai**
Bachelor of Technology, Information Technology - 8.3 CGPA — 2022- May 2026

K.M.E.S Jr College — **Bhiwandi, Thane**
HSC - 71.17 % — 2020-2022

TECHNICAL SKILLS

- Programming - **Java, C, JavaScript, C++.**
- FrontEnd - **HTML5, CSS3, ReactJS.**
- BackEnd- **NodeJs, Express.js, FAST API, REST API.**
- AI/ML: **Machine Learning, Deep Learning, NLP, Data Science, LLMs.**
- Databases- **PostgreSQL, MongoDB.**
- Deployment & Tools- **Git,Vercel,GitHub**
- Soft Skills – **Leadership, Team Collaboration, Problem Solving, Technical communication, Customer focused problem solving.**

EXPERIENCE

DataMatex Technologies– Software Developer Intern (Bhiwandi) — **Dec 2025- March 2026**

- Developed **responsive websites** for 3+ local businesses, improving their online visibility and customer engagement by ~18% through modern **UI/UX design and mobile optimization.**
- Implemented performance and **SEO improvements** that reduced page load time by 25% and increased inquiry form submissions by ~12%

UptoSkills – Deep Learning Intern (Remote Internship) — **Jun 2025- Sept 2025**

- Led a team as **Junior Team Lead**, driving video analytics projects and mentoring peers in machine learning model implementation.
- Developed a deep learning–based chain snatching detection system using **YOLO** + **3D-CNN** + **DeepSORT**, achieving ~**90% detection accuracy** for real-time surveillance.

Oasis Infobyte – Data Science Intern (Virtual Internship) — ***Feb 2025 - Mar 2025***

- Built and trained basic **Machine learning models** for tasks such as **Classification and Regression using Python and scikit learn.**
- Applied algorithms like **Linear Regression and Random Forest** to small scale datasets, enhancing understanding of end to end ML workflows.

Infosys Springboard – Deep Learning Intern (Remote Internship) — ***Nov 2024 - Jan 2025***

- Worked on **deep learning-based NLP** applications involving multilingual sentence classification using **GRU and BiLSTM** architectures.
- Built and deployed multilingual NLP models with strong **data preprocessing pipelines**, while collaborating with a remote team to enhance model performance and user interface integration.

PROJECTS

ChainCred – Decentralized Verifiable Credential Platform [REACT,NODE.JS,MONGO DB, SOLIDITY, OPBNB, BNB GREENFIELD] ***Aug 2025***

- Built a **DeSoc dApp** with secure EVM wallet login where institutes issue verifiable credentials stored immutably on-chain, reducing academic verification time from **several days to < 2 minutes** through instant, tamper-proof record access.
- Developed a student dashboard and resume builder to manage verifiable credentials, integrating OCR based document scanning and an **AI driven networking** system for improved student connectivity.

CryptGuard – Privacy-Preserving Encrypted Traffic Threat Detection System [C++, PYTHON, DPI, ML, TLS/JA3] ***March 2026***

- Built a high-performance **multi-threaded** DPI engine for real-time encrypted traffic analysis using **consistent hashing and hierarchical load balancing**, achieving ~22K+ flows/sec with ~0.044 ms latency. Designed a zero-decryption pipeline extracting TLS/JA3, HTTP, DNS, and metadata for privacy-preserving inspection.
- Implemented hybrid threat detection using rules, AbuseIPDB, and Random Forest (CICIDS ~160K), achieving ~**99% accuracy** and detecting C2 beaconing via behavior analysis.

GateSmart – AI-Powered Study Companion [REACT, FastAPI, PostgreSQL, Random Forest, Together AI] ***May 2025***

- Developed a **full stack** web application with a clean, responsive UI and **REST-based backend**, focusing on reliable functionality across different browsers and screen sizes.
- Integrated a Random Forest based revision scheduling system and an **AI tutor powered by LLaMA 3.3**, with **JWT authentication**, hashed passwords, and mock quiz management.

ACHIEVEMENTS

- Intern of the Month (August 2025) – Uptoskills, *Deep Learning Team*
- Honourable Mention (Global Level) – *ChainCred Project*, BNB Hackathon
- Secured 1st Rank in Code War competition organized by IEEE PCE at intra-college level.
- Secured Top 5 in a System Design Hackathon by a leading tech community.
- Co-authored a technical survey paper: "Brand Match: An AI-driven Influencer Marketing Platform."
